**ScreenItalia**<sup>®</sup>  
Test per la salute

Screen Italia®, known as one of the leading brands for Professional Use IVDs and Instruments is an Italian brand, owned by Screen Italia S.r.l., company awarded for professionalism, stability and innovation in the rapid test field in 2022.

Our brand Screen® is synonymous of quality, stability, punctuality and innovation since **2006** among the leading companies in the rapid diagnostics field. 17 years of success, thanks to the partners who believe in us.

## Technical Specifications

**Product Code:** SC-1194-01 | SC-0869-01

All in one instrument – Multi-Language Pack – Results in 30 Seconds – Automatically Registers Data and Reports of the Exams – To read all Screen® IVD Rapid Tests. Screen BOX and its software are Screen Italia own Property. The only instrument WorldWide which reads over 100 tests with only 1 Instrument. This instrument is optional for the rapid tests.

**Multilanguage:**

ITALIAN | FRENCH | GERMAN | SPANISH | GREEK | HUNGARIAN  
(New languages can be added for free within 1 month)

Dimensions:	Cm. 8x14x21
Weight:	Gr. 1150
Temperature:	From 5°C to 35°C
Location:	Indoors use
Reader Type:	5 Megapixel Auto Focus USB Camera Module 32mmx32mm
Resolution:	1600x1200
Interface:	USB 2.0
Power Requirements:	12 Vcc, 1-25 A
Power consumptions:	12 W
Minimum System Requirements	Windows XP Service Pack 3, Vista, Windows 7/8/10
Protocol:	DirectShow Video Source Filter for M-JPEG Cameras
CE Mark	Yes
Manufacturer	Screen Italia S.r.l.

## ScreenBOX Detailed Features:

**ScreenBOX**, constantly upgrading with such innovative technologies rolled into a light and small instrument, practical, simple and professional. Suitable for both fixed and remote testing stations.

### Additional Features:

- Simple and intuitive installation procedure, also possible with USB key, using Standalone package without Internet connection;
- Software with extended compatibility from Windows XP up to the latest Windows 11 version and iOS through Parallels@;
- Plug-and-play Screen BOX hardware reader without the need to install any drivers;
- simple and automatic calibration procedure;
- Ability to read both test cup and test cassette using the same instrument;
- Automatic generation of the personal data, both single operator and of the single subject, directly from the main interface of the software while compiling the data before the test reading (with automatic saving of the data entered) or from the “Personal Data” menu (with dedicated saving);
- Main interface with automatic loading of the last entered data and auto-completion of the data already entered and stored during typing or from the drop-down menu;
- Multi-operator function: the software supports up to 256 operators each with their own patient data (subjects / patients remain connected to the operator) and personalized settings of their profile;
- Possibility to customize extended for each operator: logo and header, operator signature, selection / deselection of specific elements such as pH, creatinine, date of birth and ID card of each tested subject, ID code, operator signature, signature of the patient, saving of the reading reports in any personal destination of the single operator (e.g., in an external HD);
- Possibility to insert unlimited additional information for each subject thanks to the Custom fields section;
- Possibility of exporting and importing subjects, and importing/exporting from one operator to another or from / to other software through the xml format;
- Preview of the test reading report before saving / printing with the possibility of modifying some parameters;
- Possibility, in addition to the generation and saving of the report in pdf format, also to export the result of the test image in graphic format and of the entire report in text format (this allows simplified imports of the reports on other software platforms or databases external);

### Full Options and hacks:

- Excluding the operator and / or subject data from the printing of the report
- Use the internal pdf viewer of the software if the pc does not have its own pdf viewing program
- Check for updates both when starting the software, automatically, and manually at any time (always, of course, in the presence of an internet connection)
- Select the software language
- Enlarge the software window by adapting it to the screen resolution, if it is such that it does not allow the correct display of the software window
- Use a virtual keyboard (alternatively or in conjunction with the physical one)
- Backup and restore function of the minutes archive and database
- In an SDK (libraries + manual) can be provided for interfacing / integration with other software also in a completely transparent way.

# DRUG TEST

6

DRUG TEST

# SCREEN DROGA TEST CAPELLO

(HAIR DRUG TEST )

**Product Code:** SC-1170-20

Rapid test for the qualitative detection of Cotinine, Methamphetamines, Morphine/Cocaine and Cocaine in human hair. For professional medical use only. The rapid hair test has unique advantages in the field of rapid drug testing.

# SCREEN DROGA TEST SUPERFICI | POLVERI

(SURFACE POWDERS DRUG TEST )

**Product Code:** SC-0371-25

The Screen Drug Test Surfaces and Solids is a rapid chromatographic immunoassay for the qualitative detection of multiple drugs and metabolites on surfaces and solids.

# SCREEN TEST NICOTINA

(COTININE RAPID TEST PANEL)

**Product code:** SC-1019-40

Quick test for quality identification of cotinine (nicotine metabolite) via urine. Only for the determination of smoker status. Not thought for medical diagnostic use. The COT rapid test is a quick chromatographic immunological test for cotinine detection. Also available in the version via saliva (nicotine-s screen test product code: sc-1026-25).

# SCREEN TEST ADULTERAZIONE

(ADULTERATION STRIPS)

**Product code:** SC-0807-25

Disposable screening rapid test to simultaneously detect creatinine, nitrites, glutaraldehyde, pH, specific weight and oxidants/pyrhythinium chlorren in human urban. The disposable test of the sample is a semi-quantitative screening test that is based on color comparison, to detect creatinine, nitrites, glutaraldehyde, pH, specific weight and oxidizing/pyrhythin chrook (CCP) in human urine. This test provides only a preliminary screening.

# SCREEN 1 BENZODIAZEPINE

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-0036-25

The Benzodiazepine Rapid Screen 1 Test (Urine) is a rapid chromatographic immunoassay for the detection of Oxazepam (main metabolite) in the urine at a threshold-limit concentration of 300ng/ml. Benzodiazepines are drugs frequently prescribed for the symptomatic treatment of anxiety and sleep disorders. They produce their effects through specific receptors involving a neurochemical called gamma aminobutyric acid (GABA).

# SCREEN 1 BUPRENORFINA

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-0029-25

The Screen 1 Buprenorphine rapid test (Urine) is a rapid chromatographic immunoassay for the qualitative detection of Buprenorphine in urine at a threshold concentration of 10 ng/ml. Buprenorphine is a powerful pain reliever often used in the treatment of opiate addiction. Therapeutically, buprenorphine is used as a replacement therapy for opiate addicts.

# SCREEN 1 KETAMINA

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-0067-25

The Screen 1 Ketamine (Urine) rapid test is a chromatographic rapid immunoassay for the detection of Ketamine (main metabolite) in urine at a threshold-limit concentration of 1.000ng/ml. This test will detect other related compounds, please refer to the Analytical Specificity table in this package insert. Ketamine is a dissociative anesthetic developed in 1963 to replace PCP (Phencyclidine).

# SCREEN 1 MARIJUANA

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-0098-25

The THC Rapid Test Panel (Urine) is a rapid chromatographic immunoassay for the detection of 1 THC metabolite in human urine at a cut-off concentration of 50ng/mL. Users have impaired short-term memory and slowed learning. Users may also experience transient episodes of confusion and anxiety. Long term relatively heavy use may be associated with behavioral disorders. The peak effect of smoking Marijuana occurs in 20-30 minutes and the duration is 90-120 minutes after one cigarette.

# SCREEN 1 AMFETAMINA

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-1781-25

The Rapid Screen 1 Amphetamine Test (Urine) is a rapid immunochromatographic test for the detection of Amphetamine in human urine at a cut-off concentration of 1,000 ng/mL. This test will also identify other related compounds. Amphetamine is a Schedule II substance of the American DEA sold by prescription and available illegally on the market. Amphetamines are a class of potent sympathomimetic agents with therapeutic functions.

# SCREEN 1 BARBITURICI

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-1774-25

The Rapid Screen 1 Barbiturates Test (Urine) is a rapid lateral scroll immunochromatographic test for the detection of Barbiturates in human urine at the threshold-limit concentration of 300 ng / ml. This test also detects other compounds, please refer to the Analytical Specificity table in this package insert. Barbiturates are central nervous system depressants. They are used for therapeutic purposes as sedatives, hypnotics and anticonvulsants. Barbiturates are almost always taken orally in the form of tablets or pills.

# SCREEN 1 METAMFETAMINA

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-1767-25

Single drug test using urine, detects Methamphetamine, is a stimulant drug that energetically activates certain brain systems, MetAmphetamine is very similar chemically to Amphetamine, but its effects on the central nervous system are greater. MetAmphetamine is produced in illegal laboratories and has a high potential for abuse and addiction. The drug can be taken orally, injected or inhaled. High acute doses induce excessive stimulation of the central nervous system, euphoria, lucidity, reduced appetite and a sense of increased energy and power.

# SCREEN 1 COCAINA

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-0043-25

Single drug test using urine, detects only Cocaine, a powerful stimulant of the central nervous system and a local anesthetic. Initially, it causes extreme energy and restlessness but gradually becomes tremor, hypersensitivity and spasms. Cocaine, taken in high doses, causes fever, loss of sensation, difficulty in breathing and loss of consciousness. Cocaine is often self-administered by nasal inhalation, intravenous injection and free-base smoking. It is eliminated in the urine over a short period of time mainly as benzoylecgonine.

# SCREEN 1 MDMA | EXSTASY

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-0487-25

The Screen 1 MDMA Rapid Test, Ecstasy (Urine) is a rapid immunochromatographic test for the detection of Methylenedioxymethamphetamine (basic ingredient of Ecstasy) in human urine at the threshold concentration – limit of 500 ng/ml. This test also detects other compounds, please refer to the Analytical Specificity table in this package insert. Methylenedioxymethamphetamine (Ecstasy) is a designer drug first synthesized in 1914 by a German pharmaceutical company for the treatment of obesity.

# SCREEN 1 METADONE

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-0074-25

The Screen 1 Methadone Rapid Test Cassette (MTD) (Urine) is a side scrolling chromatographic immunoassay for the detection of Methadone in urine at a threshold concentration of 300ng/ml. This test will detect other related compounds, please refer to the Analytical Specificity table in this package insert. Methadone is a narcotic analgesic for the treatment of moderate to severe pain. It is also used in the treatment of heroin addiction.

# SCREEN 1 OPPIACEI

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-0081-25

The OPI Rapid Test Panel (Urine) is a rapid chromatographic immunoassay for the detection of Morphine in human urine at the cut-off concentration of 2,000 ng/mL. This test will detect other related compounds. Opiate refers to any drug that is derived from the opium poppy, including the natural products, Morphine and Codeine, and the semi-synthetic drugs such as heroin. Opioid is more general, referring to any drug that acts on the opioid receptor.

# SCREEN 1 K2-SPICE

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-0050-25

The Synthetic Marijuana (K2) Rapid Test Panel (Urine) is a rapid chromatographic immunoassay for the detection of Synthetic Marijuana metabolite in human urine. The synthetic marijuana detected by the test includes, but are not limited to, the metabolites of JWH-018 and JWH-073. Synthetic Marijuana or K2 is a psychoactive herbal and chemical product that, when consumed, mimics the effects of Marijuana. It is best known by the brand names K2 and Spice, both of which have largely become genericized trademarks used to refer to any synthetic Marijuana product.

# SCREEN 1 FENTANYL

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-1828-25

The FYL (Fentanyl) Rapid Test Panel (Urine) is a rapid immunochromatographic assay for the qualitative detection of Norfentanyl, a metabolite of Fentanyl. It is a potent narcotic analgesic, abuse of which leads to habituation or addiction. Fentanyl, belongs to powerful narcotics analgesics, and is a  $\mu$  special opiates receptor stimulant. Fentanyl is one of the varieties that been listed in management of United Nations “Single Convention of narcotic drug in 1961”.

# SCREEN 1 PROPOSSIFENE

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-2030-25

The Rapid PPX (Urine) test is a rapid immunochromatographic test for the detection of propoxyphene in human urine at a concentration of 300 ng/mL. It is a diagnostic test for use by healthcare professionals, including those at points of care. Peak propoxyphene concentrations in plasma are reached 1-2 hours after a dose. In the event of an overdose, propoxyphene concentrations in the blood may reach significantly higher levels.

# SCREEN 1 TRAMADOLO

(ONE STEP RAPID TEST CARD)

**Product Code:** SC-2047-25

The rapid panel test TML (Urine) is a rapid immunochromatographic test for the qualitative detection of Tramadol in human urine at a concentration of 100 ng/mL. Approximately 30% of the dose is excreted in the urine as unchanged drug, while 60% of the dose is excreted as metabolites. The main routes appear to be N- and O-demethylation, glucuronidation or sulphation in the liver.

# SCREEN 5

(MULTI LINE DRUG RAPID TEST CASSETTE)

**Product Code:** SC-0128-25

Detects on urine samples n. 5 substances simultaneously with specific results for each substance analysed. Detects: Propoxyphene, Ketamine, Fentanyl, Anti-Depressant Tricyclics, Buprenorphine.

# SCREEN 5

(MULTI DRUG RAPID TEST PANEL)

**Product Code:** SC-0104-25

Detects on urine samples n. 5 substances simultaneously with specific results for each substance analysed. It detects cocaine and metabolites, amphetamine, methamphetamine (including ecstasy MDMA), marijuana and opiates.

# SCREEN 5

(MULTI LINE DRUG RAPID TEST CASSETTE)

**Product Code:** SC-0111-25

Detects on urine samples n. 5 substances simultaneously with specific results for each substance analysed. Detects: Oxycodone, EDDP, Phencyclidine, Tramadol, Synthetic Marijuana K2.

# SCREEN 7+AD

(MULTI DRUG RAPID TEST PANEL)

**Product Code:** SC-0135-25/SC-0821-25

Urine drug test with incorporated control of Creatinine and pH. Analyzes: Cocaine and metabolites (COC 300), Amphetamine (AMP 500), Methamphetamine (MET 500), Marijuana (including Cannabinoids THC) (THC 50), Opiates (including Heroin Morphine and metabolites) (MOP 300), Methylenedioxymethamphetamine Ecstasy (MDMA 500), Methadone (MTD 300).

# SCREEN CUP 7+AD

(MULTI DRUG RAPID TEST CUP)

**Product Code:** SC-0142-25

Urine drug test Cup with integrated control of Creatine and pH (adulterants). It analyzes cocaine and metabolites (COC 300), amphetamine (AMP 500), methamphetamine (MET 500), marijuana (including cannabinoids THC) (THC 50), opiates (including heroin morphine and metabolites) (MOP 300), methylenedioxymethamphetamine ecstasy (MDMA 500), methadone (MTD 300), also checks the validity of the urine sample via an adulteration test present in the test.

# SCREEN CUP 7+ADU

(MULTI DRUG RAPID TEST CUP)

**Product Code:** SC-1224-25

The test analyzes the required substances with the cut-offs indicated by the law and has incorporated in the test the control of OX, S.G., PH, NIT, GLUT and CRE. Analyzes: Cocaine and metabolites (COC 300), Amphetamine (AMP 500), Methamphetamine (MET 500), Marijuana (including Cannabinoids THC) (THC 50), Opiates (including Heroin, Morphine and metabolites) (MOP 300), Methylenedioxymethamphetamine ecstasy (MDMA 500), Methadone (MTD 300), also checks the validity of the urine sample via an adulteration test present in the test.

# SCREEN 8

(MULTI LINE DRUG RAPID TEST CASSETTE)

**Product Code:** SC-0173-25

The test analyzes the following substances with the indicated cut-offs: cocaine and metabolites (COC 300), amphetamine (AMP 500), methamphetamine (MET 500), buprenorphine (BUP 5), marijuana (including cannabinoids THC) (THC 50), opiates (including heroin morphine and metabolites) (MOP 300), methylenedioxymethamphetamine ecstasy (MDMA 500), methadone (MTD 300).

# SCREEN 8

(MULTI LINE DRUG RAPID TEST CASSETTE)

**Product Code:** SC-0166-25

Urine drug test analyzes cocaine and metabolites (COC 300), amphetamine (AMP 500), methamphetamine (MET 500), buprenorphine (BUP 10), marijuana (including cannabinoids THC) (THC 50), opiates (including heroin morphine and metabolites) (MOP 300), methylenedioxymethamphetamine ecstasy (MDMA 500), methadone (MTD 300).

# SCREEN 8

(MULTI DRUG RAPID TEST PANEL)

**Product Code:** SC-0180-25

Urine drug test that detects 8 substances simultaneously via urine: cocaine and metabolites, amphetamine, marijuana (including THC cannabinoids), opiate (including heroin, morphine and metabolites), benzodiazepines, barbiturates, Methadone and antidepressants.

# SCREEN 8+AD

(MULTI DRUG RAPID TEST PANEL)

**Product Code:** SC-0418-25

Screen Multi Dip-Line 8 + AD analyzes the required substances with the cut-offs indicated by the law and has incorporated in the test the control of Creatinine and Ph. Analyzes: Cocaine and metabolites (COC 300), Amphetamine (AMP 500), Methamphetamine (MET 500), Buprenorphine (BUP 5), Marijuana (including cannabinoids THC) (THC 50), Opiates (including Heroin Morphine and metabolites) (MOP 300), Methylenedioxymethamphetamine Ecstasy (MDMA 500), Methadone (MTD 300), also controls the validity of the urine sample via an adulteration test present in the test. Check the Creatinine and Ph.

# SCREEN 8+AD

(MULTI DRUG RAPID TEST PANEL)

**Product Code:** SC-0159-25/SC-0838-25

Screen Multi Dip-Line 8 + AD analyzes the required substances with the cut-offs indicated by the law and has incorporated in the test the control of Creatinine and Ph. Analyzes: Cocaine and metabolites (COC 300), Amphetamine (AMP 500), Methamphetamine (MET 500), Buprenorphine (BUP 10), Marijuana (including cannabinoids THC) (THC 50), Opiates (including Heroin Morphine and metabolites) (MOP 300), Methylenedioxymethamphetamine Ecstasy (MDMA 500), Methadone (MTD 300).

# SCREEN CUP 8+AD

(MULTI DRUG RAPID TEST CUP)

**Product Code:** SC-0203-25/SC-0814-25

SCREEN CUP 8 + AD analyzes the required substances with the cut-offs indicated by the law and has incorporated in the test the control of Creatinine and Ph. Analyzes: Cocaine and metabolites (COC 300), Amphetamine (AMP 500), Methamphetamine (MET 500), Buprenorphine (BUP 10), Marijuana (including cannabinoids THC) (THC 50), opiates (including heroin morphine and metabolites) (MOP 300), Methylenedioxymethamphetamine Ecstasy (MDMA 500), Methadone (MTD 300).

# SCREEN CUP 8+A+AD

(MULTI DRUG RAPID TEST CUP)

**Product Code:** SC-0197-25

SCREEN CUP 8 + A + AD analyzes the required substances with the cut-offs indicated by the law and has incorporated in the test the control of Alcohol ETG, Creatinine and Ph. Analyzes: Cocaine and metabolites (COC 300), Amphetamine (AMP 500), Methamphetamine (MET 500), Buprenorphine (BUP 10), Marijuana (including cannabinoids THC) (THC 50), opiates (including Heroin Morphine and metabolites) (MOP 300), Methylenedioxymethamphetamine Ecstasy (MDMA 500), Methadone (MTD 300), it also checks the validity of the urine sample by means of an adulteration test present in the test and the presence of alcohol (ETG).

# SCREEN 9

(MULTI LINE DRUG RAPID TEST CASSETTE)

**Product Code:** SC-0210-25

Drug Test via urine that detects 9 substances simultaneously with specific result for each substance analyzed. This urine drug test simultaneously detects: Methadone, Morphine, Cocaine, Thc, Amphetamines, Benzodiazepines, Tricycle Antidepressants, Barbiturates, MDMA. It is sold in boxes of 25 pieces.

# SCREEN 10

(MULTI LINE DRUG RAPID TEST CASSETTE)

**Product Code:** SC-0258-25

Drug test that detects 10 substances in urine: Cocaine and metabolites (300), Amphetamines (500), Methamphetamines (500), Ecstasy MDMA (500), Marijuana (Cannabinoids THC) (50), Opiates (Morphine, Heroin and metabolites) (300), Benzodiazepines (300), Methadone (300), Buprenorphine (10), TCA Antidepressant tricycles (1000). (The 120ml urine container is supplied separately, you can buy it on the "Accessories" page).

# SCREEN 10

(MULTI DRUG RAPID TEST PANEL)

**Product Code:** SC-0234-25

Drug test that detects 10 substances simultaneously via urine: cocaine and metabolites, amphetamine, marijuana (including cannabinoids THC), opiates (including heroin, morphine and metabolites), methamphetamines (including ecstasy), buprenorphine, benzodiazepines, barbiturates, methadone and antidepressants.

# SCREEN 10

(MULTI LINE DRUG RAPID TEST CASSETTE)

**Product Code:** SC-0241-25

Drug test that detects 10 substances in urine: Cocaine and metabolites (300), Amphetamines (1000), Meth-Amphetamines (500), Ecstasy MDMA (500), Marijuana (Cannabinoids THC) (50), Opiates (Morphine, Heroin and metabolites) (300), Benzodiazepines (300), Methadone (300), Pencyclidine (25), Barbiturates (300).

# SCREEN 10

(MULTI LINE DRUG RAPID TEST CASSETTE)

**Product Code:** SC-0265-25

Drug test that detects 10 substances via urine: Buprenorphine, fenciclidine, antidepressants TCA, Tramadol, Ketamine, EDDP, Fentanil, K2 synthetic drugs, propoxifen, oxycodone.

# SCREEN 10

(MULTI DRUG RAPID TEST PANEL)

**Product Code:** SC-0227-25

Drug test that detects 10 substances simultaneously via urine: Cocaine and metabolites, Amphetamine, Marijuana (including cannabinoids THC), Opiates (including heroin, morphine), Methamphetamines (including ecstasy), Pencyclidines, Benzodiazepines, Barbiturates, Methadone and Antidepressants.

# SCREEN CUP 10+A+AD

(MULTI DRUG RAPID TEST CUP)

**Product Code:** SC-0272-25

The drug test analyzes the following substances: Amphetamines, Barbiturates, Buprenorphine, Benzodiazepines, Cocaine, MDMA (Ecstasy), Methadone, Opiates, Phencyclidine, Thc (Marijuana), also checks the validity of the urine sample through an adulteration test present in the test ( PH, SG, OX, CR, NI, GL) and the presence of alcohol. For professional in vitro diagnostic use only.

# SCREEN CUP 10+A+AD

(MULTI DRUG RAPID TEST CUP)

**Product Code:** SC-0298-25

The test detects 10 substances simultaneously plus adulterants and Alcohol test ETG: Amphetamine, Methamphetamine, Barbiturates, Buprenorphine, Benzodiazepine, Cocaine, Opiates, Methadone, Ketamine, THC (Marijuana), For professional in vitro diagnostic use only.

# SCREEN 12

(MULTI LINE DRUG RAPID TEST CASSETTE)

**Product Code:** SC-0319-25

Drug Test via urine that detects 12 substances simultaneously with specific result for each substance analyzed. This urine drug test detects at the same time: Cocaine and metabolites, Ketamine, Methamphetamine, MDMA (Ecstasy), Marijuana (including Cannabinoids THC), Methadone, Oxycodone, Benzodiazepines, Synthetic Drugs K2, Buprenorphine, Tramadol and opiates (including heroin morphine and metabolites) .

# SCREEN 12

(MULTI DRUG RAPID TEST PANEL)

**Product Code:** SC-0326-25

Drug Test via urine that detects 12 substances simultaneously with specific result for each substance analyzed. This urine drug test detects MOP300 / MDMA500 / OXY100 / PCP25 / COC300 / MTD300 / BAR300 / BZO300 / AMP1000 / MET500 / TCA1000 / THC50.

# SCREEN CUP 12+A+AD

(MULTI DRUG RAPID TEST CUP)

**Product Code:** SC-0296-25

Drug Test 12 Substances + Creatine + Ph + Alcohol Test Cup Version. The test detects 12 substances simultaneously plus ETG, Creatinine and Ph: Barbiturates, Buprenorphine, Benzodiazepines, Cocaine, Amphetamines, Methamphetamines, Methadone, Opiates, Oxycodone, Ketamine, Propoxyphene, THC (Marijuana).

# SCREEN CUP 12+A+AD

(MULTI DRUG RAPID TEST CUP)

**Product Code:** SC-0302-25

Drug Test 12 Substances + Creatine + Ph + Alcohol Test Cup/Tumbler Version. The test detects 12 substances simultaneously plus the Alcohol ETG, Creatinine and Ph control: Barbiturates, Buprenorphine, Benzodiazepines, Cocaine, MDMA (Ecstasy), Methamphetamine, Methadone, Opiates, Oxycodone, Phencyclidine, Propoxyphene, Thc (Marijuana).

# SCREEN 6-S

(MULTI DRUG RAPID TEST ORAL FLUID)

**Product Code:** SC-0388-25

Drug test by saliva, detects the following substances: opiates and metabolites, cocaine and metabolites, marijuana cannabinoids (THC), amphetamine, mdma and methadone.

# SCREEN MIDSTREAM 6-S

(MULTI DRUG RAPID TEST ORAL FLUID)

**Product Code:** SC-0449-25

Available in the version of 6 substances that analyzes by saliva: opiates, cocaine, THC, amphetamines, methamphetamines including mdma and oxycodone. (Opi-MOP 40 / COC 30 / THC 25 / ANF 40 / MET 40-MDMA 50 / Oxy 40). Chromatographic rapid immunological test for the qualitative identification of more drugs and their metabolites in saliva.

# SCREEN MIDSTREAM 6-S-MED

(MULTI DRUG RAPID ORAL FLUID)

**Product Code:** SC-0333-25

Analyzes 6 substances that analyzes through saliva: opiates (40 ng/ml), cocaine (30 ng/ml), cannabinoids/marijuana (THC) (10ng/ml) , Amphetamines (40 ng/ml), metamphetamines (40 ng/ml) and MDMA ecstasy (50 ng/ml). Quick chromatographic immunological test for the qualitative identification of multiple drugs and their metabolites in saliva, are included in the analyzed substances: morphine (40 ng/ml), codeine (40 ng/ml), Didrocodeine (40 ng/ml), 6-MAM (4 ng/ml), benzailecgonine ( 30 ng/ml), MDA MDEA MBDB (50 ng/ml). etc.

# SCREEN 6-S2

(MULTI DRUG RAPID TEST ORAL FLUID)

**Product Code:** SC-0395-25

The 6-S2 Test Screen Drug detects the following substances through saliva: opiates, oxycodone, cocaine, marijuana cannabinoids (THC), amphetamines, methamphetamine including MDMA ecstasy.

# SCREEN MIDSTREAM 6-S2

(MULTI DRUG RAPID TEST ORAL FLUID)

**Product Code:** SC-0364-25

Available in the version of 6 substances that analyzes through saliva: opiates, cocaine, cannabinoids (THC), amphetamines, methamphetamine including MDMA ecstasy, synthetic k2/spice drugs.

# SCREEN MIDSTREAM 6-S3

(MULTI DRUG RAPID TEST ORAL FLUID)

**Product Code:** SC-0357-25

Available in the version of 6 substances that analyzes by saliva: opiates, cocaine, cannabinoids (THC), amphetamines, methamphetamine including MDMA ecstasy, benzodiazepines.

# SCREEN MIDSTREAM 6-S4

(MULTI DRUG RAPID TEST ORAL FLUID)

**Product Code:** SC-0340-25

Available in the version of 6 substances that analyzes through saliva: opiates, cocaine, cannabinoids (THC), amphetamines, methamphetamines including MDMA ecstasy, methadone.

# SCREEN CUP 10-S

(MULTI DRUG RAPID TEST ORAL FLUID)

**Product Code:** SC-0005-25

Anti-drug test that detects 10 substances by saliva: cocaine, opiates, marijuana (THC cannabinoids), K2 synthetic drugs, ketamine, amphetamines, metanphetamines, MDMA ecstasy, methadone and alcohol. Screen CUP 10-S is a drug test with a reliability of 98%.

# DISPOSABLE ALCOL TEST

33

DISPOSABLE ALCOL TEST

# SCREEN ALCOL TEST ETG

(ETHYL GLUCORONIDE TEST PANEL)

**Product Code:** SC-0012-40

The Ethyl Glucuronide (ETG) Rapid Test Panel (Urine) is a rapid chromatographic immunoassay for the detection of Ethyl Glucuronide in human urine. Ethyl Glucuronide (ETG) is a metabolite of ethyl alcohol which is formed in the body by glucuronidation following exposure to ethanol. This assay provides only a preliminary analytical test result. For professional in vitro diagnostic use only.

# ETIL PROFESSIONAL

(SALIVA ALCOHOL TEST STRIP)

**Product Code:** SC-1002-40

Etil Professional rapid test is a chemical method test to detect alcohol (ethyl alcohol/ethanol) in saliva and other liquid specimen. By examination of saliva specimen, you can estimate the blood alcohol concentration. This chemical method gives a qualitative result. The assay detects ethanol at a concentration of 0.1% or 10 mg/dL respectively by color change of the reaction or test pad. The blue color intensity increases with the alcohol concentration in the sample.

# PREGNANCY GYNECOLOGY

35

PREGNANCY | GYNECOLOGY

# SCREEN TEST PH VAGINALE

(VAGINAL PH RAPID TEST)

Product code: SC-0753-25

The Vaginal pH Rapid Test Panel (Vaginal Swab) is a rapid dry chemical method for the semi-qualitative detection of pH in female vaginal swab specimens to aid in the diagnosis of bacterial vaginosis. An acidic vaginal pH value of 3.8 to 4.5 is a basic requirement for the optimal functioning of the body's own system of protecting the vagina. Under the influence of lacto-bacteria, the glycogen released from the upper vaginal epithelium degrades to form the sugar glucose and then lactic acid. This results in an acid environment forming in the vagina, with a pH value that is usually 3.8 to 4.5.

# SCREEN TEST FAMILY SPERM

(SPERM CONCENTRATION RAPID TEST)

Product code: SC-0784-40

The kit is used to qualitatively detect sperm count of human semen in vitro and conducting auxiliary clinical diagnosis of the infertility and self-evaluation male fertility. For professional in vitro diagnostic use only.

# SCREEN TEST HCG

(PREGNANCY RAPID TEST (10NG))

Product code: SC-0425-40

The HCG Pregnancy Rapid Test Cassette is a rapid chromatographic immunoassay for the qualitative detection of Human Chorionic Gonadotropin in urine, to aid in the early detection of pregnancy. The test uses two lines to indicate results.

**Cut-Off:** 10 mIU/mL

**Pack Size:** 40T

# SCREEN TEST HCG

(PREGNANCY RAPID TEST (25NG))

Product code: SC-0432-40

The HCG Pregnancy Rapid Test Cassette is a rapid chromatographic immunoassay for the qualitative detection of Human Chorionic Gonadotropin in urine, to aid in the early detection of pregnancy. The test uses two lines to indicate results.

**Cut-Off:** 25 mIU/mL

**Pack Size:** 40T

# INFECTIOUS DISEASE

38

INFECTIOUS DISEASE

# SCREEN TEST COVID-19 SALIVA

(SARS COV-2 ANTIGEN ORAL FLUID RAPID TEST)

**Product Code:** SC-1286-20

Screen Test Rapid Antigen Covid-19 is a rapid immunochromatographic test for the qualitative detection of SARS-CoV-2 antigens present in human oral fluid. The results show the detection of SARS-CoV-2 antigens. An antigen is usually

detectable in upper airway samples during the acute phase of infection. Positive results indicate the presence of viral antigens, but clinical correlation with the patient's history and other diagnostic information is necessary to determine the infectious status.

# SCREEN TEST COVID-19 RBD-IGG

(SARS COV-2 RBD-IGG RAPID TEST)

**Product Code:** SC-1415-20

Rapid test for the qualitative detection of IgG SARS-CoV-2 S-RBD antibodies and/or Nucleocapsid protein in human whole blood, serum or plasma. For professional in vitro diagnostic use only. The COVID-19 Rapid IgG Test (whole blood/serum/plasma) is a lateral flow immunochromatographic assay for the qualitative detection of IgG antibodies against the receptor binding domain protein (RBD) and/or nucleocapsid (S) spike SARS-CoV-2 in whole blood, serum or plasma samples.

# SCREEN TEST COVID-19 + FLU A|B

(SARS COV-2 ANTIGEN + INFLUENZA A/B RAPID TEST)

**Product Code:** SC-1262-20

The Covid-19 and Influenza A+B Antigen Rapid Test is a rapid immunochromatographic test for the qualitative detection of SARS-CoV-2, Influenza A and Influenza B virus antigens present in nasopharyngeal swab specimens. The result is separate for Covid and Influenza A/B.

# SCREEN TEST COVID-19 IGG|IGM

(SARS COV-2 IGG/IGM RAPID TEST)

**Product Code:** SC-1200-10

Rapid test for the qualitative detection of IgG and IgM antibodies to 2019-nCov (Coronavirus virus) in whole blood samples with lancing device. For professional in vitro diagnostic use only. The Screen Covid-19 IgG/IgM 2019-nCOV rapid test is a lateral flow chromatographic immunoassay for the qualitative detection of IgG and IgM antibodies to 2019-nCov in human whole blood serum and plasma samples.

# SCREEN TEST COVID-19 AG

(SARS COV-2 ANTIGEN RAPID TEST)

**Product Code:** SC-1255-20

The Covid-19 Rapid Antigen Test (Nasopharyngeal Swab) is a rapid immunochromatographic test for the qualitative detection of SARS-CoV-2 antigens present in nasopharyngeal swab specimens. The results detect SARSCoV-2 antigen. The antigen is generally detectable in upper respiratory tract swabs during the acute phase of infection

# SCREEN TEST COVID-19 NT

(SARS COV-2 NEUTRALIZATION ANTIBODY RAPID TEST)

**Product Code:** SC-1569-20

The SARS-CoV-2 Neutralising Antibody Rapid Test (Whole Blood/Serum/Plasma) is a rapid immunochromatographic test designed for the qualitative detection of neutralising antibodies against SARS-CoV-2 that block the interaction between the viral spike glycoprotein receptor-binding domain (RBD) and the cell surface receptor ACE2 in human serum, plasma or whole blood.

# SCREEN TEST GIARDIA LAMBLIA

(GIARDIA LAMBLIA RAPID TEST)

**Product Code:** SC-0555-20

The Giardia Lamblia Rapid Cassette Test (Faeces) is a rapid chromatographic immunoassay for the qualitative detection of Giardia Lamblia antigen in human feces samples.

# SCREEN TEST ROTAVIRUS

(ROTAVIRUS RAPID TEST)

**Product Code:** SC-0692-25

Rapid test for Rotavirus is a rapid immunochromatographic test for the qualitative detection of Rotavirus in human feces samples to aid in the diagnosis of Rotavirus infection. For professional in vitro diagnostic use only.

# SCREEN TEST CLOSTRIDIUM A+B

(CLOSTRIDIUM DIFFICILE TOXIN A + TOXIN B RAPID TEST)

**Product Code:** SC-0494-10

The Toxin A + Toxin B Clostridium difficile Combination Rapid Test (Faeces) is a rapid chromatographic immunoassay for the qualitative detection of Toxin A and Toxin B Clostridium difficile antigens in human faeces samples. For professional in vitro diagnostic use only.

# SCREEN TEST H. PYLORI AB

(H. PILORY ANTIBODY RAPID TEST)

**Product Code:** SC-0609-40

Rapid test for the detection of Helicobacter Pylori (H.pylori) antibodies in whole blood, serum or plasma. For professional in vitro diagnostic use only.

# SCREEN TEST CHLAMYDIA

(CHLAMYDIA RAPID TEST)

**Product Code:** ICH-502(SC-0500-20))

The Chlamydia Rapid Test (Swab/Urin) is a lateral slide immunochromatographic test for the detection of Chlamydia antigen in female cervical swabs, male urethral swabs and male urine samples. For professional in vitro diagnostic use only.

# SCREEN TEST CLOSTRIDIUM

(CLOSTRIDIUM DIFFICILE GDH RAPID TEST)

**Product Code:** SC-0470-25

The Clostridium difficile rapid test is an immunochromatographic rapid test for the qualitative detection of Clostridium difficile GDH in human faeces samples. For professional in vitro diagnostic use only.

# SCREEN TEST MONONUCLEOSI

(MONONUCLEOSIS RAPID TEST)

**Product Code:** SC-0647-25

Rapid test for the diagnosis of Infectious Mononucleosis (MI) to detect heterophile antibodies qualitatively in whole blood, serum or plasma. For professional in vitro diagnostic use only.

# SCREEN TEST MYCOPLASMA

(MYCOPLASMA PNEUMONIAE ANTIGEN RAPID TEST)

**Product Code:** SC-0654-25

The Rapid Mycoplasma Pneumoniae Antigen Test is a rapid chromatographic immunoassay for the qualitative detection of Mycoplasma pneumoniae (M. pneumoniae) antigens in human pharyngeal swabs. It is designed to assist in the rapid differential diagnosis of Mycoplasma pneumoniae infections. For professional in vitro diagnostic use only.

# SCREEN TEST H. PYLORI AG

(H. PYLORI ANTIGEN RAPID TEST)

Product Code: SC-0616-25

Rapid test for the qualitative detection of Helicobacter Pylori (H.pylori) antigens in human faeces. For professional in vitro diagnostic use only.

# SCREEN TEST FLU A|B

(INFLUENZA A/B RAPID TEST)

Product Code: SC-0623-20

Rapid test for the qualitative detection of Influenza A and Influenza B virus on nasal swab, pharyngeal swab or nasal aspirate samples. The Influenza A+B rapid test is a rapid immunochromatographic test for the qualitative detection of influenza A and B antigens on nasal swab, pharyngeal swab or nasal aspirate samples. It is intended to assist in the rapid differential diagnosis of influenza A and B viral infections.

# SCREEN TEST STREP A

(STREPTOCOCCUS A RAPID TEST)

**Product Code:** SC-0715-20

Single-phase membrane well immunoassay for the rapid and qualitative determination of qualitative determination of group A streptococci antigens directly from pharyngeal swab pharyngeal swab, positive and negative control also included in the package. For professional in vitro diagnostic use only.

# SCREEN TEST TETANO

(TETANUS ANTIBODY RAPID TEST)

**Product Code:** SC-0746-40

Rapid immunoassay for the qualitative detection of tetanus toxin antibodies in blood samples. The test is designed to assist tetanus prophylaxis of patients at risk. Since this disease does not confer immunity, the only prevention is vaccination. Immunoprotection is provided by measuring the concentration of tetanus antibodies. As part of emergency medicine, knowing the immune status of at-risk subjects (deep wounds) in real time allows better management of appropriate tetanus prophylaxis. For professional in vitro diagnostic use only.

# SCREEN TEST NOROVIRUS

(NOROVIRUS RAPID TEST)

**Product Code:** SC-0678-25

The rapid test for Norovirus (Faeces) is a rapid immunochromatographic test for the qualitative detection of Norovirus in human faeces samples useful in the diagnosis of Norovirus infection. For professional in vitro diagnostic use only.

# SCREEN TEST SIFILIDE

(SYPHILIS RAPID TEST)

**Product Code:** SC-0722-40

The Rapid Syphilis Test (Whole Blood/Serum/Plasma) is a qualitative, membrane-based immunoassay for the detection of TP antibodies (IgG and IgM) in whole blood, serum or plasma. For professional in vitro diagnostic use only.

# SCREEN TEST RUBELLA IGM

(RUBELLA IGM RAPID TEST)

**Product Code:** IRM-302(SC-0685-40))

Rapid immunochromatographic test for the qualitative detection of Rubella IgM antibodies in human serum or plasma to aid in the diagnosis of Rubella infection. For professional diagnostic use only.

# SCREEN TEST LEGIONELLA

(LEGIONELLA PNEUMOPHILA RAPID TEST)

**Product Code:** SC-0630-25

Rapid test for the qualitative detection of Legionella pneumophila antigen in urine samples. For professional in vitro diagnostic use only. The Legionella pneumophila (Urine) rapid test is an in vitro diagnostic immunochromatographic test.

# SCREEN TEST CHIKUNGUNYA

(CHIKUNGUNYA IGG/IGM RAPID TEST)

**Product Code:** SC-0517-20

The Chikungunya IgG/IgM Rapid Test (Whole Blood/Serum/Plasma) is a rapid immunoassay for the detection of Chikungunya IgG and IgM antibodies in human whole blood, serum or plasma. It is intended to be used as a screening test and as an aid in the diagnosis of CHIK infection. For professional in vitro diagnostic use only.

# SCREEN TEST ZIKA

(NS1 ZIKA RAPID TEST)

**Product Code:** SC-0760-40

The NS1 Zika Rapid Test (Whole Blood/Serum/Plasma) is a rapid immunochromatographic assay for the qualitative detection of NS1 Zika virus antigen in human whole blood, serum or plasma, which aids in the diagnosis of Zika infections. For professional in vitro diagnostic use only.

# SCREEN TEST MALARIA

(MALARIA P.F./P.V. RAPID TEST)

**Product Code:** SC-0661-25

The Rapid Malaria P.f./P.v. (Whole Blood) Test is a qualitative, membrane-based immunoassay for the detection of P.f. and P.v. antigens in whole blood. For professional in vitro diagnostic use only.

# SCREEN TEST ADENOVIRUS

(ADENOVIRUS RAPID TEST)

**Product Code:** SC-0456-25

The Adenovirus Rapid Test Cassette is a single-step immunochromatographic rapid test for the qualitative determination of Adenoviruses in human faeces. For professional in vitro diagnostic use only.

# SCREEN TEST PNEUMOCOCCO

(S. PNEUMONIAE ANTIGEN RAPID TEST)

**Product Code:** SC-0708-25

Rapid test for the qualitative detection of Streptococcus pneumoniae antigens in human urine samples. For professional in vitro diagnostic use only.

# SCREEN TEST TUBERCOLOSI

(TUBERCULOSIS RAPID TEST)

**Product Code:** SC-0739-40

Rapid test for the qualitative detection of anti-TB antibodies (IgG, IgM and IgA isotypes) in whole blood, serum or plasma samples. The Rapid Tuberculosis Test (Whole Blood/Serum/Plasma) is a qualitative, solid phase, direct, two-site immunoassay for the detection of anti-TB antibodies in whole blood, serum or plasma samples. For professional diagnostic use only

# SCREEN TEST DENGUE NS1

(DENGUE NS1 RAPID TEST)

**Product Code:** SC-0548-25

The Dengue NS1 Rapid Cassette Test (Whole Blood/Serum/Plasma) is a rapid immunochromatographic test for the qualitative detection of Dengue virus NS1 antigen in human whole blood, serum or plasma, as an aid in the diagnosis of Dengue infections.

# SCREEN TEST DENGUE COMBO

(DENGUE NS1 + IGG/IGM COMBO RAPID TEST)

**Product Code:** SC-0531-25

The Dengue Combo Cassette Test (whole blood/serum/plasma) is a rapid chromatographic immunoassay for the qualitative detection of NS1 antigen and IgG and IgM antibodies to Dengue virus in human whole blood, serum or plasma, as an aid in the diagnosis of Dengue infections.

# SCREEN TEST GONORRHEA

(GONORRHEA RAPID TEST)

Product Code: SC-1187-25

Rapid test for the qualitative detection of Gonorrhoea antigen on female cervical and male urethral swab specimens. For professional in vitro diagnostic use only.

# SCREEN TEST CRYPTOSPORIDIUM

(CRYPTOSPORIDIUM RAPID TEST)

Product Code: SC-0524-10

The Cryptosporidium (faeces) Rapid Cassette Test is a rapid chromatographic immunoassay for the qualitative detection of Cryptosporidium antigens in human faeces.

# SCREEN TEST EPATITE A | HAV

(HEPATITIS A - HAV IGM RAPID TEST)

**Product Code:** SC-0562-25

Rapid test for the qualitative detection of hepatitis A virus in serum or plasma. For professional in vitro diagnostic use only. The HAV IgM cassette test is a rapid chromatographic immunoassay for the qualitative detection of Hepatitis A virus (HAV) IgM antibodies in serum or plasma.

# SCREEN TEST EPATITE B | HBSAG

(HEPATITIS B HBSAG RAPID TEST)

**Product Code:** IHBSG-402

Rapid test for the qualitative detection of Hepatitis B surface antigen (HbsAg) in whole blood, serum or plasma. The Hepatitis B - HBsAg Cassette Rapid Test is a rapid test for the qualitative detection of HBsAg in whole blood, serum or plasma samples.

# SCREEN TEST EPATITE C | HCV

(HEPATITIS C - HCV RAPID TEST)

**Product Code:** IHC-402

The Hepatitis C HCV rapid cassette test (whole blood / serum / plasma) is a rapid immunochromatographic test for the qualitative detection of Hepatitis C virus antibody in whole blood, serum or plasma.

# SCREEN TEST CAMPYLOBACTER

(CAMPYLOBACTER RAPID TEST)

**Product Code:** SC-0463-10

Rapid test for the qualitative detection of Campylobacter in human feces samples. For professional in vitro diagnostic use only. The Rapid Campylobacter (Feces) Cassette Test is based on the use of colloidal gold membrane technology. A nitrocellulose membrane is sensitized with direct anti-Campylobacter antibody. The specificity of the test is ensured by a specific antibody to a Campylobacter antigen conjugated with colloidal gold.

# SCREEN TEST HIV 1.2

(HIV 1.2 RAPID TEST)

**Product Code:** IHI-402

HIV Rapid Test (whole blood | serum| plasma) is an immunochromatographic test for the qualitative antibody to Human Immunodeficiency virus (HIV) in whole blood, serum or plasma, to help diagnose HIV Infections.

# SCREEN TEST VAIOLO DELLE SCIMMIE

(MONKEYPOX VIRUS ANTIBODY RAPID TEST)

**Product Code:** SC-2368-25

Lateral slide immunochromatographic test for the qualitative detection of Monkeypox antibodies in whole blood, serum or plasma to aid in the diagnosis of Monkeypox infection. For professional in vitro diagnostic use only.

# SCREEN TEST RSV

(RSV ANTIGEN RAPID TEST)

**Product Code:** SC-2382-20

Rapid test for the qualitative detection of Syncytial Respiratory Virus Antigen on nasopharyngeal swab or nasal aspirate specimens. The RSV (Nasopharyngeal Swab/Nasal Aspirate) Cassette Rapid Test is a rapid immunochromatographic test for the qualitative detection of Syncytial Respiratory Virus Antigen on nasopharyngeal swab or nasal aspirate specimens. It is designed to assist in the rapid differential diagnosis of respiratory syncytial virus infections.

# SCREEN TEST COVID-19 AG+ FLU A|B + RSV

(SARS COV-2 AG + FLU A/B + RSV COMBO RAPID TEST)

**Product Code:** SC-2399-20

Screen Rapid Antigen Combo Test SARS-CoV-2/Influenza A+B/RSV is a rapid immunochromatographic assay for the qualitative detection of Nucleocapsid protein antigens SARS-CoV-2, Influenza A, Influenza B and Respiratory Syncytial Virus (RSV) present in the nasopharyngeal tract of individuals with suspected SARS-CoV-2/Influenza/RSV infection in conjunction with clinical evaluation and other laboratory tests. The results detect Nucleocapsid protein antigens SARS-CoV-2, Influenza A+B and RSV. For professional in vitro diagnostic use only.

# INFLAMMATORY MARKER

59

INFLAMMATORY MARKER

# SCREEN TEST CRP

(C-REACTIVE PROTEIN RAPID TEST)

**Product Code:** SC-0975-25

The C-Reactive Protein Rapid Test Cassette (Whole Blood/Serum/Plasma) is a rapid chromatographic immunoassay for the semi-quantitative detection of human CRP in whole blood, serum or plasma to aid in the detection of myocardial infarction (MI). C-reactive protein (CRP) in patient serum has been found in association with acute infections, necrotic conditions and various inflammatory disorders. There is a strong correlation between serum levels of PCR and the activation of the inflammatory process.

# SCREEN TEST PROCALCITONINA

(PROCALCITONIN (PCT) RAPID TEST)

**Product Code:** SC-0999-25

The Rapid Qualitative PCT Test (Whole Blood/Serum/Plasma) is a rapid immunochromatographic test for the qualitative detection of Procalcitonin in whole blood, serum or plasma. The Rapid Qualitative PCT Test (Whole Blood/Serum/Plasma) is a qualitative lateral scrolling immunoassay for the detection of PCT in whole blood, serum or plasma. The membrane is pre-coated with anti-PCT antibodies on the test line area. During the test, the serum or plasma sample reacts with the particle coated with anti-PCT antibody. The compound migrates upwards on the membrane chromatographically by capillary action to react with the anti-PCT antibodies on the membrane and generates a colored line.

# TUMORAL MARKER

61

TUMORAL MARKER

# SCREEN TEST FOB

(FECAL OCCULT BLOOD RAPID TEST)

**Product Code:** SC-0883-25

The Screen FOB rapid test (Feces) is a rapid immunochromatographic test for the qualitative detection of Human Occult Blood in feces. Many diseases can cause hidden blood in the stool. This is also known as Fecal Occult Blood (FOB), Human Occult Blood or Human Hemoglobin. In the early stages, gastrointestinal problems such as colon cancer, ulcers, polyps, colitis, diverticulitis, and fissures may show no visible symptoms, only occult blood. Traditional methods based on guaiac testing are insensitive and specific and also have dietary restrictions prior to testing.

# SCREEN TEST PSA

(PROSTATE-SPECIFIC ANTIGEN RAPID TEST)

**Product Code:** TPS-402

The Prostate Specific Antigen PSA Semi-Quantitative Rapid Test (Whole Blood/Serum/Plasma) is a rapid chromatographic immunoassay for the semi-quantitative detection of Prostate Specific Antigen in whole blood, serum or plasma. The prostate specific antigen (PSA) is produced by the endothelial and glandular cells of the prostate.

# SCREEN TEST CALPROTECTINA

(CALPROTECTIN RAPID TEST)

**Product Code:** SC-0777-25

The rapid test for Calprotectin in feces is a rapid immunochromatographic test for the qualitative detection of Calprotectin in human stool samples useful in the diagnosis of inflammatory gastrointestinal disorders. The Calprotectin Rapid Test Cassette (Feces) can detect low Calprotectin levels as low as 50 µg/g or 140 ng/ml of stool. Within-run precision was determined using 15 replicates of three samples: 140 ng/mL, 500 ng/mL, and 10 µg/mL positive samples.

# CARDIAC MARKER

64

CARDIAC MARKER

# SCREEN TEST MIOG. | TROP. | CK-MB

(MYOGLOBIN | CK-MB | TROPONIN I RAPID TEST)

**Product Code:** SC-0982-40

Rapid test for the diagnosis of myocardial infarction (MI) to qualitatively detect cardiac Myoglobin, CK-MB and Troponin I (c Tnl) in whole blood, serum or plasma. For professional in vitro diagnostic use only. The Myoglobin/CK-MB/Troponin I Combo Rapid Test Cassette (Whole Blood/Serum/Plasma) is a rapid immunoassay for the qualitative detection of human cardiac Myoglobin, CK-MB and Troponin I (c Tnl) in whole blood, serum or plasma and assists in the diagnosis of myocardial infarction (MI). Myoglobin (MYO), Creatinine Kinase MB (CK-MB) and cardiac Troponin I (cTnl) are proteins released into the bloodstream following heart damage.

# GENERAL HEALTH

66

GENERAL HEALTH

# SCREEN TEST VITAMINA D

(VITAMIN D RAPID TEST)

**Product Code:** SC-0791-25

Rapid test for the semi-quantitative detection of 25-hydroxyvitamin D in human whole blood. For professional in vitro diagnostic use only. The Vitamin D Rapid Test Cassette is an immunochromatographic rapid test for the semiquantitative detection of 25-hydroxyvitamin D (25 (OH) D) in human fingertip whole blood, whole blood at a cut-off concentration of  $30 \pm 4$  ng / mL. This test provides a preliminary diagnostic test result and can be used to screen for vitamin D deficiency. Vitamin D refers to a group of fat-soluble secosteroids responsible for increasing intestinal absorption of calcium, iron, magnesium, phosphate and zinc.

# SCREEN TEST ABO - RhD

(BLOOD GROUP RAPID TEST)

**Product Code:** OABD-402

Screen Test ABO – RhD Rapid Test Cassette (Whole Blood) is a solid-phase method test for the regular ABO and RhD blood group detection. The test is intended for professional use to help diagnose the blood type. Human blood has a variety of blood types, and the most common blood type system is ABO (blood types are divided into A, B, AB and O types according to the presence or absence of A and B antigens in red blood cells). The second is the Rh blood system which divides blood groups into Rh positive and negative based on the presence or absence of D antigen on red blood cells.

# BREATHALYZER

68

BREATHALYZER

# ALCOTRUE M

(ALCOHOL BREATHALYZER)

Product code: 5040112002 (Alcotrue M) – 4040112007 (Printer)

Portable Breathalyzer, with class I electrochemical sensors with  $\pm 2\%$  margin of error, printer and disposable mouthpiece. It comes in a case with inside: The Breathalyzer, 25 individually wrapped mouthpieces and 4 rechargeable batteries. This breathalyzer requires calibration once every 6 months. Our Breathalyzer unlike other products on the market is equipped with multilingual PC Software. Internal memory for up to 9999 tests, 2-year warranty. CE Class I product with measuring functions.

## MOUTHPIECES

(ALCOTRUE M BREATHALYZER MOUTHPIECES)

Product code: 4040121001

As accessories of the Alcotrue M Breathalyzer, are available disposable mouthpieces in separate sale, those are sold in packs of 25 mouthpieces.

# URINALYSIS

70

URINALYSIS

# SCREEN GENERIC TEST URINA

(URINALYSIS TEST STRIPS)

## SCREEN GENERIC TEST URINA 12

Ref. SC-0920-100  
Pack of 100 Strips

- Leukocytes
- Nitrite
- Urobilinogen
- Protein
- pH
- Blood
- Specific Gravity
- Ascorbic Acid
- Ketone
- Bilirubin
- Glucose
- Microalbumin

## SCREEN GENERIC TEST URINA 10

Ref. SC-0906-100  
Pack of 100 Strips

- Leukocytes
- Nitrite
- Urobilinogen
- Protein
- pH
- Blood
- Specific Gravity
- Ketone
- Bilirubin
- Glucose

## SCREEN GENERIC TEST URINA 11 \*

Ref. SC-0913-100  
Pack of 100 Strips

- Ascorbic acid
- Glucose
- Bilirubin
- Ketone
- Specific Gravity
- Blood
- pH
- Protein
- Urobilinogen
- Nitrite
- Leukocytes

*\* Pre-order only*

Urine undergoes many changes during states of disease or body dysfunction before blood composition is altered to a significant extent. Urinalysis is a useful procedure as an indicator of health or disease, and as such, is a part of routine health screening. The Urinalysis Reagent Strips (Urine) can be used in general evaluation of health, and aids in the diagnosis and monitoring of metabolic or systemic diseases that affect kidney function, endocrine disorders and diseases or disorders of the urinary tract.

The Urinalysis Reagent Strips (Urine) are firm plastic strips onto which several separate reagent areas are affixed. The test is for the qualitative and semi-quantitative detection of one or more of the following analytes in urine: Ascorbic acid, Creatinine, Microalbumin, Glucose, Bilirubin, Ketone Acetoacetic acid, Specific Gravity, Blood, pH, Protein, Urobilinogen, Nitrite and Leukocytes, Calcium. The Urinalysis Reagent Strips (Urine) are for single use in professional near-patient (point-of-care) and centralized laboratory locations. Refer to kit box label for the specific analyte(s) listed and compare to the appropriate analyte(s) and color blocks on the color chart for results.

# SCREEN ANALYSIS READER

(URINALYSIS READER – OPTIONAL READER FOR SCREEN GENERIC TEST URINA)

## SCREEN ANALYSIS READER 10

**Product code:** SC-0937-01

Reader for 10 Parameter Urine Reactive Strips with thermal printer. Small size analyzer, Precise and effective, No maintenance required, Wireless thermal printer (optional), Capacitive touch keyboard, sensitive reaction, 1200mAh rechargeable internal battery.

## SCREEN ANALYSIS READER 11

**Product code:** SC-0944-01

Reader for 11 Parameter Urine Reactive Strips with thermal printer. Small size analyzer, Precise and effective, No maintenance required, Wireless thermal printer (optional), Capacitive touch keyboard, sensitive reaction, 1200mAh rechargeable internal battery.

## SCREEN ANALYSIS READER 12

**Product code:** SC-0951-01

12 Parameter Urine Test Strip Reader with thermal printer. Small size analyzer, Precise and effective, No maintenance required, Wireless thermal printer (optional), Capacitive touch keyboard, sensitive reaction, 1200mAh rechargeable internal battery.

Instrument is necessary to perform the tests in the Fluorescence Immunoassay Section.

Fluorescence Immunoassay Analyzer is based on detection of fluorescence emitted during an immunoassay with antigen-antibody interaction. Fluorescence Immunoassay Analyzer offers the advantages of high accuracy, strong stability and fast results, with possibility of semi-quantitative or quantitative results it represents the II generation on the rapid screening field. The Instrument should be used only with in vitro diagnostic tests manufactured by Screen Italia. It is designed to results by the examination of human samples with specific in vitro diagnostic test units which Screen Italia provides, within the categories of inflammation markers, coagulation, endocrinology, tumor markers, diabetes, cardiac markers, autoimmunity, infectious disease, etc. Possibility to have the instruments in English, French and Italian, with Printer integrated.

# SCREEN IFA ANALYZER

(FLUORESCENCE IMMUNOASSAY ANALYZER)

**Product code:** SC-1491-01  
**Reading Time:** 10 seconds  
*Available in French, English, Italian*  
**Built-in Thermal Printer**

## Product Features

1. Plug and play Simple Operation supported by ID cards eliminating the need for calibration each time.
2. Ideal for Emergency situations with lightweight and easy operation.
3. Quantitative Test Results Critical for emergency therapeutic decisions.
4. Reading time less than 10 seconds - Time-saving.
5. Eliminates the need for constant clearing of cache with a storage capacity of up to 10000 test results.
6. Built-in thermal printer, printing test reports instantly.
7. Option of connecting to Laboratory information system.

## Technical Specifications

Principle:	Fluorescence Immunoassay
Test Format :	Cassette
Measurement :	Quantitative, Qualitative
Read Time :	< 10 Seconds
Display :	7" LCD touch screen
Power Source :	DC 12V
Dimensions (L*W*H) :	280*240*130 mm
Weight :	<2.5 kg
OS :	Linux-based, Windows-Compatible program
Storage Condition :	-10 - 30°C
Working Condition :	4- 30°C
Printer :	Built-in thermal printer
Connectivity :	USB 4 ports, LAN port, RS232 COM port (WLAN and GPRS are optional functions)
Compatibility :	LIS, HIS

# SCREEN IFA ANALYZER SMART

(FLUORESCENCE IMMUNOASSAY ANALYZER)

## Technical Specifications

**Product code:** SC-1323-01  
Reading Time: 10 seconds  
*Available in English in Pre-order*  
*Available in Italian*

## Product Features

1. Plug and play Simple Operation supported by ID cards eliminating the need for calibration each time.
2. Ideal for Emergency situations with lightweight and easy operation.
3. Quantitative Test Results Critical for emergency therapeutic decisions.
4. Reading time less than 10 seconds - Time-saving.
5. Option of connecting to Laboratory information system.
6. Rechargeable Li-ion Battery for more convenient use

Principle:	Fluorescence Immunoassay
Test Format :	Cassette
Measurement :	Quantitative, Qualitative
Read Time :	< 10 Seconds
Display :	4.3" LCD touch screen
Power Source :	2*4300mAh
Dimensions(L*W*H) :	220*100*75 mm
Weight :	<1.5 kg
OS :	Windows-Compatible Proprietary Program
Storage Condition :	-10 - 40°C
Working Condition :	4- 30°C
Printer :	External thermal printer
Connectivity :	USB port, Bluetooth, RS232 COM port (WIFI and GPRS are optional functions)
Built-in battery:	Rechargeable Li-ion battery
Compatibility :	LIS, HIS

# SCREEN IFA TEST COVID-19 IGG/IGM

(FLUORESCENCE IMMUNOASSAY COVID-19 IGG/IGM)

**Product code:** SC-1309-20

Immunofluorescence assay for the qualitative detection of Sars-CoV-2 IgG and IgM antibodies in human whole blood, serum or plasma using the Immunofluorescence Analyzer as an aid in the diagnosis of Covid-19 infection. For professional in vitro diagnostic use only.

# SCREEN IFA TEST COVID-19 AG

(FLUORESCENCE IMMUNOASSAY COVID-19 ANTIGEN)

**Product code:** SC-1293-20

The Covid-19 antigen cassette test is an immunofluorescence test for the qualitative detection of Sars-CoV-2 antigens present in the human nasopharynx using the Immunofluorescence Analyser. For professional in vitro diagnostic use only.

# SCREEN IFA TEST CK-MB

(FLUORESCENCE IMMUNOASSAY CK-MB)

Product code: SC-1477-20

Test for the diagnosis of Creatine Kinase MB (CK-MB) by measurement in whole blood, serum or plasma using the Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST CRP

(FLUORESCENCE IMMUNOASSAY C-REACTIVE PROTEIN)

Product code: SC-1361-20

Rapid test for the diagnosis of inflammatory status and ACS by measurement of CRP/hs-CRP on whole blood, serum or plasma using the Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST MICROALBUMINURIA

(FLUORESCENCE IMMUNOASSAY MICROALBUMIN)

Product code: SC-1330-20

Rapid test for the measurement of Microalbumin in urine using the Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST HBA1C

(FLUORESCENCE IMMUNOASSAY HBA1C)

Product code: SC-1347-20

Rapid test for measuring the HbA1c (glycated hemoglobin) value in whole blood using the Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST LH

(FLUORESCENCE IMMUNOASSAY LH HORMONE)

Product code: SC-1460-20

Test for the detection of luteinizing hormone (LH) in whole blood, serum or plasma using the Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST MIOGLOBINA

(FLUORESCENCE IMMUNOASSAY MYOGLOBIN)

Product code: SC-1484-20

Test for the diagnosis of myocardial infarction (MI) by measuring myoglobin in whole blood, serum or plasma using the Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST FSH

(FLUORESCENCE IMMUNOASSAY FOLLICLE STIMULATING HORMONE - FSH)

Product code: SC-1385-20

Follicle stimulating hormone (FSH) test for the detection of follicle stimulating hormone (FSH) in whole blood, serum or plasma using the Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST INFLUENZA A/B

(FLUORESCENCE IMMUNOASSAY INFLUENZA A/B)

Product code: SC-1408-20

Immunofluorescence test for the diagnosis of Influenza A and Influenza B virus on nasopharyngeal swab, throat swab or nasal aspirate samples using the Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST FOB

(FLUORESCENCE IMMUNOASSAY FECAL OCCULT BLOOD)

Product code: SC-1316-20

Rapid test for the diagnosis of Occult Human Blood in feces using the SCREEN® Immunofluorescence Analyzer. For professional in vitro use only.

# SCREEN IFA TEST D-DIMERO

(FLUORESCENCE IMMUNOASSAY D-DIMER)

Product code: SC-1583-20

Rapid test for the measurement of D-Dimer in whole blood or plasma using Screen® Immunofluorescence Analyzer. For professional in vitro diagnostic use only. D-Dimer (or D dimer) is a breakdown product of fibrin (or FDP), a small protein fragment present in blood after a blood clot has been broken down by fibrinolysis.

# SCREEN IFA TEST PROCALCITONINA

(FLUORESCENCE IMMUNOASSAY PROCALCITONIN)

Product code: SC-1392-20

Test for the diagnosis of inflammatory status by measurement of Procalcitonin (PCT) on whole blood, serum or plasma using the Immunofluorescence Analyser. For professional in vitro diagnostic use only.

# SCREEN IFA TEST TSH

(FLUORESCENCE IMMUNOASSAY THYROID STIMULATING HORMONE)

Product code: SC-1378-20

Rapid test for the quantitative detection of TSH in serum or plasma using the immunofluorescence analyzer. The TSH Cassette Test (Immunofluorescence Assay) is designed for the in vitro quantitative determination of TSH in serum or plasma. For professional in vitro diagnostic use only.

# SCREEN IFA TEST TROPONINA I

(FLUORESCENCE IMMUNOASSAY TROPONIN I)

Product code: SC-1590-20

Rapid test for the diagnosis of myocardial infarction (MI) to detect Cardiac Troponin I (cTnI) in whole blood, serum or plasma using the Screen® Immunofluorescence Analyser. The Cardiac Troponin I (Whole Blood/Serum/Plasma) cassette test detects Cardiac Troponin I (cTnI) by immunofluorescence.

# SCREEN IFA TEST CEA

(FLUORESCENCE IMMUNOASSAY CARCINOEMBRYONIC ANTIGEN)

Product code: SC-1354-20

Fluorescence Immunoassay test kit for measuring Carcinoembryonic Antigen (CEA) in serum or plasma with the use of Fluorescence Immunoassay Analyzer. Carcinoembryonic Antigen (CEA) is an antigen associated with cancer characterized as oncofetal glycoprotein. CEA is expressed in a variety of malignant tumors, in particular lung or gastrointestinal cancers (e.g. colon cancer, liver cancer and lung cancer). For professional in vitro diagnostic use only.

# SCREEN IFA TEST PSA

(FLUORESCENCE IMMUNOASSAY PSA)

Product code: SC-2337-25

The cassette test (Serum/Plasma) for Prostate Specific Antigen (PSA) is based on the immunofluorescence for the quantitative detection of Prostate Specific Antigen in serum or plasma with the use of the SCREEN® Immunofluorescence Analyser for professional in vitro diagnostic use only.

# SCREEN IFA TEST T3

(FLUORESCENCE IMMUNOASSAY T3)

Product code: SC-2320-25

The Screen IFA T3 (Serum/Plasma) test is based on immunofluorescence for the quantitative detection of total triiodothyronine (T3) in human serum or plasma using the SCREEN® Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST T4

(FLUORESCENCE IMMUNOASSAY T4)

Product code: SC-2313-25

The T4 (Serum/Plasma) cassette test is intended for the in vitro quantitative detection of Total Thyroxine (T4) in serum or plasma. The T4 measurement is used as an aid in the verification of thyroid function using the SCREEN® Immunofluorescence Analyzer. For professional in vitro diagnostic use only.

# SCREEN IFA TEST STREP A

(FLUORESCENCE IMMUNOASSAY STREP A)

The Strep A Test Cassette is intended for qualitative detection of strep A antigens in throat swab specimens. It is intended to aid in the rapid differential diagnosis of strep A viral infections. The test result is calculated by SCREEN® Immunofluorescence Analyzer.

# SCREEN IFA TEST VITAMINA D

(FLUORESCENCE IMMUNOASSAY VITAMIN D)

Vitamin D Test Cassette (Serum/Plasma) is intended for in vitro quantitative determination of total Vitamin D in serum or plasma. Measurement of total Vitamin D (D2+D3) is used as an aid to assessment of Vitamin D levels.
